

ABOUT US

DFEAL LLC has over two decade of experience in bringing deep procurement expertise across the full spectrum of medical and personal protective supplies ranging from FDA-cleared surgical consumables and durable medical equipment to specialized PPE, clinical trial materials, and laboratory essentials.

Our sourcing network spans hundreds of qualified domestic and international suppliers, giving federal agencies and healthcare institutions access to the right product at the right price without the delays of a fragmented supply chain.

We manage vendor qualification, compliance documentation, and delivery logistics so our clients focus on mission, not procurement.

Whether you need a single emergency order or a multi-year supply contract, DFEAL scales to meet the requirement.

Because we manage the full procurement cycle from specification to delivery; we eliminate the middleman markup and pass those savings directly to the government
